Introducing Care

A more focused conversation with your patient*

An app to drive more targeted consultations with your patients, while providing them access to supporting information about their condition and treatment

*Supporting information for the following conditions: Axial Spondyloarthritis (Ankylosing Spondylitis, Non-Radiographic Axial Spondyloarthritis), Crohn’s Disease, Hidradenitis Suppurativa, Psoriasis, Psoriatic Arthritis, Rheumatoid Arthritis and Ulcerative Colitis.

Some components and availability of product information can vary by country.

The Care+ app has been developed, maintained, and fully funded by Biogen.
Care+ is designed to support your patients. It provides information on their specific condition, and tools to help them manage their progress. This also supports your consultation with them.

INSIGHTS INTO PATIENT DISEASE CONTROL

Care+ provides detailed information on 8 different inflammatory diseases (rheumatology, dermatology and gastroenterology). Each condition has a recognised and widely used tracking tool, to monitor symptoms over time.

PRACTICAL SUPPORT TOOLS

Care+ provides simple, useful tools to help patients with their daily lives. For example: Dose and healthcare appointment reminders, guidance for administration, travel cards, medical information support and product information (content varies by country).

*Supporting information for the following conditions: Axial Spondyloarthritis (Ankylosing Spondylitis, Non-Radiographic Axial Spondyloarthritis), Crohn’s Disease, Hidradenitis Suppurativa, Psoriasis, Psoriatic Arthritis, Rheumatoid Arthritis and Ulcerative Colitis.

Some components and availability of product information can vary by country.

The Care+ app has been developed, maintained, and fully funded by Biogen.
This includes tips for daily living (specific to their condition), information on work and study environments, travel guidance, recipes, exercises and other content, designed to support their journey.

*Supporting information for the following conditions: Axial Spondyloarthritis (Ankylosing Spondylitis, Non-Radiographic Axial Spondyloarthritis), Crohn’s Disease, Hidradenitis Suppurativa, Psoriasis, Psoriatic Arthritis, Rheumatoid Arthritis and Ulcerative Colitis.
